This month commands the provident Housewife, and the prudent Artift, to set their Skills on work. In the beginning of the Month sow and set those tender Summer Herbs that would not endure the former cold. Weed your Hop Gardens, cut off superfluous Branches. Moss Trees and Gardens, and weed Corn; rise early and walk the Fields and Gardens.

Now every Garden and Hedge affords thee Food and Physick. Rise early, walk the Fields by running streams, the North and West sides. Sage and Sweet Butter, an excellent break-fast. Clarified Whay with Sage. Scurvey-Grass Ale, and Worm-wood Beer, are wholesome Drinks. Green Whay excellent against Choler. Eat and drink betimes in the morning. Abstain from Meats that are hot in Nature, and salt in Quality.

At the Full of the Moon this month and next, gather your herbs to keep dry for the whole year. Set Rosemary and Gilliflowers, sow Lettice and Radish three or four days after the Full, and they will not run to seed. Shear your Sheep, the Moon increasing. Take heed of cutting Herbs or Flowers with knife, but rather gather them with your fingers.

Let honest moderate Labour and Exercise procure your Sweat. Use thin and light Diet, and chaste thoughts tend to health. Lie not unadvisely on the ground, or over hastily drink.

Distilling of Roses, and making of Syrups and Conserve are now in prime: Use a light and thin Diet, for the Stomach is weaker now than in the former months: Clarified Whay boiled with cold Herbs, are very wholsom.

Get Rue, Wormwood, and Gall, to strew on your Floors, to destroy Fleas. At the Full Moon gather Flowers and seeds, dry your Flowers rather in the shade, than in the Sun, which too much exhalet their vertue; but to avoid corruption, let the Suns heat a little visit them.

Beware of violent heat, and sudden cold, which are the great distempers of this Month, and produce pestilential diseases: Forbear superfluous drinking, but eat heartily; use cold herbs and meats, abstain from Physick. Now the Rivers are more wholesome than the Baths. In time of Pestilence keep your Chamber windows shut till the Sun have force of shining. Perfume your Chamber every morning with Tar, upon a Chafing-dish of Coals: Use *Cardus Benedictus* boiled, and drink fasting.

Sow Wheat and Rye, remove young Plants and Trees about the New Moon, observing this as a seasonable secret, that in setting, you carefully place that side to the South and West which were so before you took up the Plant, other-  
 wise the cold kills it. Gather your remaining Winter Fruit, set all kinds of Nuts and Acorns, and cut Rose-trees but once in two years, if you intend to have store of Roses.

The Garments you last month hung on your backs in jest, now Button them close in good earnest. Cloath you now for prevention, for the cold comes insensibly, and Fogs oftentimes beget a whole Winters cold. Consult with your Tailors, as well as Physicians.

**B**UCKWORTH's LOZENGES, famous  
 for the cure of Coughs, Colds, Ca-  
 tarrhs, Hoarsness, &c. being also a great  
 Cordial, and a Sovereign Preservative a-  
 gainst all Contagious Distempers, Malign-  
 ant Airs, and Unwholsom Weather. Well  
 approved of by the chief Physicians of the  
 College, to whom the true Receipt has  
 been communicated by the Publisher here-  
 of, and are now more faithfully prepa-  
 red than ever since the Authors death, and  
 sold also by James Shipton Apothecary at  
 the Crown in Hatton-Garden.

## A Description of the four Quarters of the Year.

**T**he Spring-Quarter begins this year (as in all others) when the Sun touches the Æquinoctial Sign Aries, thereby making the days and nights equal all over the habitable World, and this year begins March the 10 at 4 in the Morning. Summer begins June the 11th, near 5 in the Morning; the Sun then hath his greatest Meridian Altitude, Declination, and Amplitude, and touches the first point of the Tropical Sign Cancer, making longest days with us and shortest nights. Autumn or Harvest Quarter begins when the Sun touches the first Scruple of the Æquinoctial Sign Libra, which this year commences Septemb. the 12th 8 min. past 8 at night, again equalizing both day and night. Winter Quarter begins December the 11th about 8 in the morning, then the Sun touches the first point of the Tropical Sign Capricorn making the longest day and shortest night in the year on this side the Æquator, and the contrary in all respects to them that inhabit the Southern part of the World.

Of the Eclipses happening this Year 1686.

**F**our times this year will the Luminaries be Eclipsed, (some say five) but none visible to us, but one of the Moon in November. The first Eclipse of the Moon falls May 27 near 11 in the Morning in about 16 deg. of the sign Sagittary. Digits Eclipsed near 11, but not to be seen of us. The second is of the Sun, November the 5th near 10 at night in 24 degrees of Scorpio, Digits Eclipsed 11 not visible to us. The third is of the Moon November the 19th about 11 at night Digits Eclipsed near 5 and may be seen if the Air be clear, it begins near 10 at night and ends a quarter after Midnight. It falls in the sign Gemini. There is another Invisible Eclipse of the Sun the 12 of May, also the 5th of December according to Ricciolus, but in regard they are Inconspicuous in our Hemisphere there needs no farther discourse thereof. There is also a Conjunction of the two Infortunate Planets Saturn and Mars in Libra the 23th of October, and they may be seen to rise together early in the Mornings with two eminent fixed Stars of the first Magnitude.

Dr Cogill told me, y<sup>t</sup> he  
gathered great quantities of  
black pearl from y<sup>e</sup> Pinna  
in a certain Island of y<sup>e</sup>  
Ind. Oceanum. & brought  
many of yem with him, to  
see if they could be used to  
make Oriental.

I saw at Mr Barton's after  
y<sup>e</sup> middle <sup>Temple</sup> a large <sup>big</sup> pearl  
of a carnation colour,  
very bright. I fancied something  
much finer, than y<sup>e</sup> natural  
one.

Rubellio Salvianj. Sea pearler  
Loudinensis. in monte Februario  
venalis.

was described by Salvian; saw  
yt on y<sup>e</sup> upper part of y<sup>e</sup> line  
we run along y<sup>e</sup> midship, it is  
marked, y<sup>e</sup> breadth of my thumb  
on each side with black spots  
in a kind of bands & manner

yo Gall bladder contained a  
dilute liquor, very transparent.

yo Duodenum was incomparably  
big & two appendices or  
miltaria caeca, full of a  
glutinous or mucilaginous  
foamy matter.

The operation of yo of partly  
the Gall bladder is  
is very remarkable in this Fish.

N. W. This was a female Fish  
and had yellow or orange coloured  
eggs.

The liver large & very pale  
or yellow. 7-8 small & of  
deep blood red colour.

N.B.

I saw in Mr Charlton  
collection of prints about  
12 light 12<sup>o</sup> plates of  
Turkish things, <sup>very nice & fine</sup> & bought in  
down by Hollar, which  
bought at Paris, & which  
have just been sent  
by Bonaparte, without naming  
him

10  
First one is a portrait of Louis  
the 16<sup>th</sup> & his family, & the 6<sup>th</sup>  
Bonaparte for his hand; & the last  
two are a magnificent collection  
of prints from off.

2 plates more great, A & B  
B upon you, & seems to  
refer to some sort.
